

Chrys's Adventures

A dyscalculia-friendly maths app for children

Page 1: App overview

Aim of the app

Help children build number sense through visual, interactive, step-by-step maths adventures that reduce anxiety and make reasoning visible.

Designed for

- Children aged 6-12
- Learners with dyscalculia
- Visual and hands-on learners
- English and Bahasa Melayu users

1 Choose between Beginner and Advanced adventures

2 Structured trail

Topics covered

- Recognizing numbers
- Real-world maths
- Number values
- Practice and test mode
- Number order
- Grouping
- Addition
- Subtraction
- Greater than (>) and less than (<)
- Multiplication
- Division

Concrete objects before symbols

Audio support

Progress tracking

Guided feedback

How Children Learn

Visual practice, independent answers, and guided reasoning

Page 2: Learning flow

Built for dyscalculia learning

one concept at a time

clear object groups

short instructions

correct reasoning after each answer

low-clutter screens

3 Learn visually

Children see maths with concrete objects, labels, and movement before symbols.

4 Practise independently

Children answer at their own pace with readable choices and replayable audio.

5 Review guided solutions

Every answer can show the method, so mistakes become learning moments.

What the app teaches

Beginner number sense

- Recognize 0-9
- Match symbols to objects
- Understand number values
- Order numbers
- Make equal groups

Operations

- Addition
- Subtraction
- Greater than / less than
- Multiplication
- Division

Application and checks

- Real-world maths
- Practice questions
- Test mode
- Step-by-step solutions
- Progress trail

Maths feels easier when children can see it, touch it, and try again.
